

————— PRESS RELEASE —————

AMSilk Exhibits Functional Silk Cosmetic Materials at in-cosmetics Global 2018

Planegg, March 21, 2018 – AMSilk GmbH, the world’s first industrial supplier of synthetic silk biopolymers, is proud to announce it will be exhibiting its advanced vegan silk cosmetic ingredients for the third year in a row at in-cosmetics Global, the world’s global launch place for innovation in self-care ingredients and technologies.

AMSilk will be displaying its Silkgel (hydrogel) and Silkbeads ingredient lines, both of which are naturally vegan, sustainable and easily integrated into personal care products. Innovative cosmetic products which feature silk biopolymers have valuable and unique properties: the silk biopolymers act like a breathable second skin by offering protection against harmful environmental factors and bacteria, and have natural fixative effects that keep cosmetic ingredients on the skin for longer time periods, prolonging and enhancing their efficacy. The hypoallergenic and biocompatible AMSilk biopolymers are well-tolerated by the skin and were awarded the ranking “excellent” by the renowned Dermatest research institute.

Silkgel and Silkbeads, which are marketed by AMSilk to leading cosmetic brands worldwide, are successfully being used in personal care and cosmetic products in a variety of countries across the world. AMSilk also has an agreement with the Swiss company RAHN to distribute AMSilk products in Germany, Austria, Switzerland, France, Monaco, Great Britain, Belgium, the Netherlands, Luxembourg and Poland. Find AMSilk and RAHN at booth 100 at in-cosmetics Global this year.

About AMSilk

AMSilk GmbH is the world’s first industrial supplier of synthetic silk biopolymers and has its headquarters in Planegg near Munich, Germany. Sustainably produced using a patented biotechnological process, AMSilk high-performance biopolymers have the unique functional properties of the

natural product they are based on. The organic high-performance material can be used in multiple ways, including in medical or technical products as well as cosmetic ingredients. AMSilk high-performance biopolymers give everyday products unique properties. Among other things, the polymers are biocompatible, breathable and especially robust.

AMSilk high-performance biopolymers are distributed in the form of Silkbeads, Silkgel (hydrogel) or Biosteel® fibers. They are currently used in coatings for medical technology products, in the textile industry and as an ingredient in cosmetic products.

About in-cosmetics Global

in-cosmetics Global is the global launch place for innovation in ingredients and technologies, providing high-level scientific education and consumer insights for formulators, R&D and regulatory professionals.

Showcasing industry trends throughout the world, in-cosmetics Global offers the opportunity to be immersed in the latest innovations, understand new developments in personal care ingredients and network with the world's personal care ingredients community.

Heading into its 28th edition in 2018, in-cosmetics Global is the leading event for personal care ingredients. The exhibition brings together personal care ingredients suppliers (exhibitors) with finished product manufacturers (visitors), each looking to network, learn about future trends, and discover new products.
